
Should measure exactly 1 in (2.54 cm)

Print at ACTUAL SIZE / 100% (not "Fit to page"), on white cardstock.

The small grey ticks at the shoulders and notches mark the two wing fold lines.

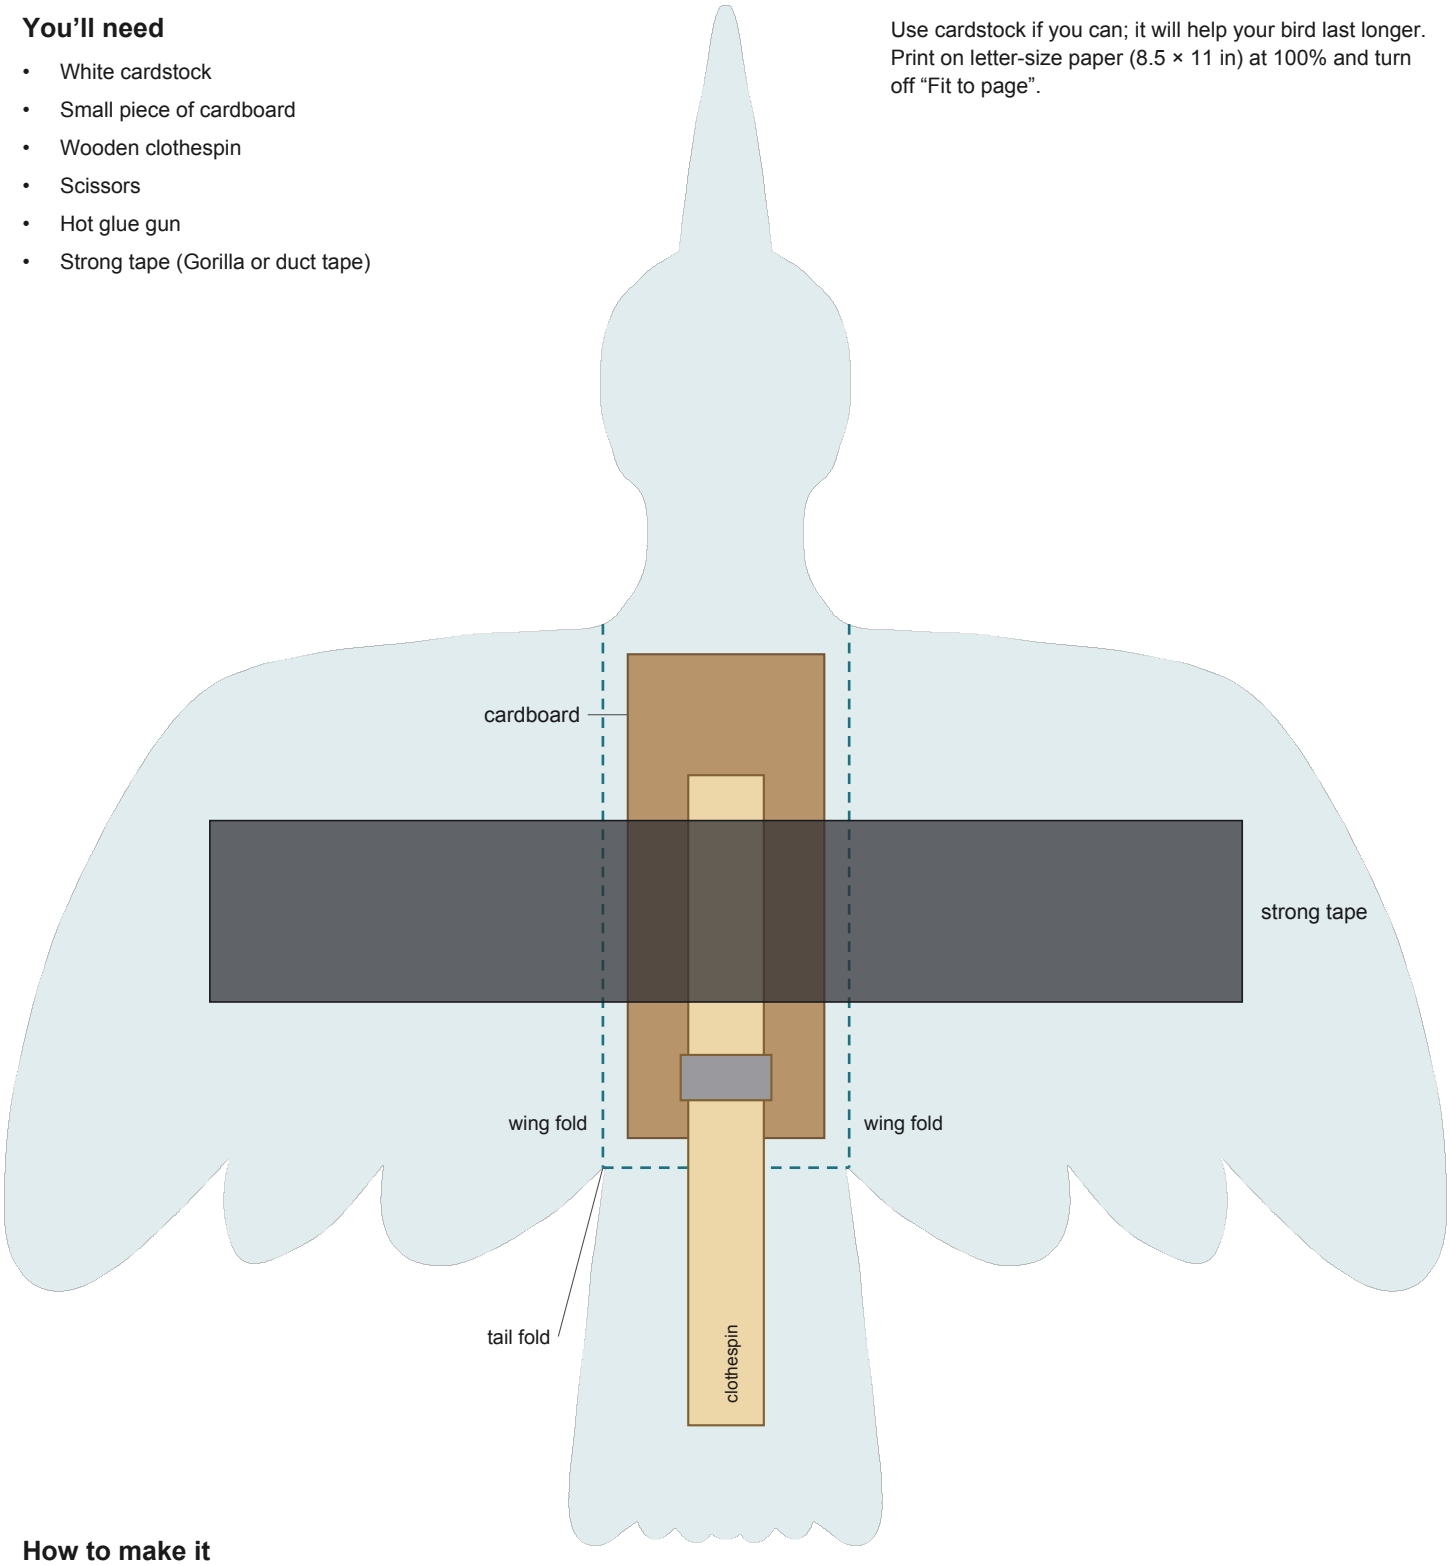
Made for a standard clothespin about 8–9 cm (3–3½ in) long.

Assembly guide – UNDERSIDE of the bird (actual size)

You'll need

- White cardstock
- Small piece of cardboard
- Wooden clothespin
- Scissors
- Hot glue gun
- Strong tape (Gorilla or duct tape)

Use cardstock if you can; it will help your bird last longer. Print on letter-size paper (8.5 × 11 in) at 100% and turn off "Fit to page".



How to make it

1. Print the bird and cut it out.
2. Cut a small rectangle of cardboard. With a grown-up's help, hot-glue it to the back of the bird where the clothespin will go.
3. Glue the clothespin onto the cardboard base.
4. Fold the wings and the tail upward.
5. On the underside of the bird, lay a strip of strong tape across the clothespin. Stick one end to each wing.
6. Gently lower the wings until they're flat, then slowly squeeze the clothespin open. The tape may lift a little from the wings the first time. Go gently… and watch your bird flap!
